

ALARM KITS 2010

AVAILABLE SYSTEM SOLUTIONS AND DECTION DEVICES ARE NOT LIMITED TO THE CONTENT OF THIS BROCHURE

Solution 16+

You want to protect yourself, your family, & business with pure performance and ease of user interaction, then the Solution 16+ is your choice. Multi-area hardwired system [with wireless options], protecting areas such as the swimming pool, building perimeter, & storerooms 24 hours a day, chimed areas discreetly notifying you of a persons presence, access control capabilities, & operator simplicity is second to none. Experience our Lifestyle Security System to the full with the Solution 16+ and you'll never turn off your alarm system again... that's our aim! Nuisance-Free Noise-Controlled Systems with you and your neighbours in mind. BOSCH Security provides 4 Area zones + 3 year warranty

Our systems of choice to implement our
Kiddiewatch, SafeHome & SafeBiz
security systems

CROW RAPID INSTALL SELF-CONTAINED WIRELESS SYSTEM

Crow Wireless provides instant security with a supreme array of wireless detection devices for INSTANT alarm system requirements.

This panel is the same as the Runner 16 above but with built-in wireless receiver and keypad for rapid install and easy relocation. An excellent choice for leased/rented premises when you wish to take your security system with you. Accepts the wired OLED keypad.

DSC RAPID INSTALL SELF-CONTAINED WIRELESS SYSTEM

DSC wireless provides instant security in a small esthetic package. Only a single zoned system but the supreme choice of 4 chime tones & detection zone control programming makes this the ideal choice for apartments & indeed homes or business which can't have a hardwired system. DSC offer a 3 year warranty.

Prices quoted are correct as at February 2010 & subject to change with manufacturer price rises. Prices are FIS unless specified. Prices include GST. Prices exclude installation. Full product brochure available upon request.

Outdoor Devices = PERIMETER SECURITY & SAFETY

The Frank O'Neill Group believes in **EFFECTIVE** security solutions... Effective intrusion protection begins at the boundary... as locks prevent entry to buildings so we believe electronic detection should also prevent entry...

Traditional intrusion protection involves predominantly internal detection devices and loud sirens... we find in many instances that due to false alarms the systems are not even turned on ... and the most common question we are asked is how long does it take for security to respond to an intrusion...

Our solution is a system design **YOU WILL TURN ON** and keep on.. And to design a system that **DETECTS INTRUSION BEFORE ENTRY** is made to the building...

Our specialized system designs include ...

Kiddiewatch _ Seniorwatch _ Safehome _ Safebiz

Detection & Siren Device Options

Bosch OD850
Tritech outdoor
Detector
