

# Graffiti Solutions

Increase capture potential of offending graffiti vandals with our Security Camera Systems

Decrease attack potential of graffiti vandalism on your premises with our perimeter detection systems

The Frank O'Neill Group is well renowned for our ability to produce security solutions that work.

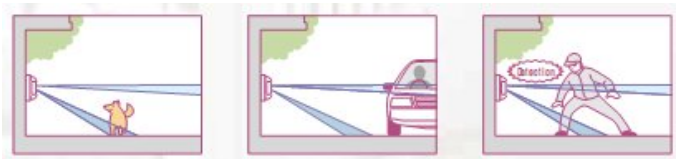

Our perimeter security solutions have become our flagship security solution for many applications, including the battle against vandalism.

The basis of our solution is the simplicity and ease of use for the user [you], and the anti-nuisance features so your neighbours won't get offended with your security system and more importantly you will never want to turn your system off!

Call Guy, Bret or Josh today to discuss how we will protect your premises...

Please refer to supporting alarm & camera brochures
